

## Crosswalk & Pedestrian Safety Tips

Pedestrian safety is crucial in large facilities such as warehouses, manufacturing plants, and distribution centers, where heavy machinery and vehicles are often in operation. Here are the top ten safety tips for pedestrian and crosswalk safety in these environments:

- 1 Use Crosswalks**  
 Always use marked crosswalks and pedestrian lanes when available. Wait for the signal or a clear indication that it's safe to cross.
- 2 Stay Alert**  
 Before stepping into a crosswalk or walkway, look in all directions for potential hazards. Don't assume that equipment operators will stop automatically, and don't assume that they can see you.
- 3 Obey Signs & Signals**  
 Signs and signals may be hung from overhead or applied to the floor. Always follow posted instructions to avoid collision and potential injury.
- 4 Stay Clear of Loading Zones**  
 Avoid walking near loading docks and loading zones where trucks and forklifts are active. These areas can be particularly hazardous.
- 5 Communicate with Operators**  
 Avoid walking near loading docks and loading zones where trucks and forklifts are active. These areas can be particularly hazardous.
- 6 Know the Rules**  
 Familiarize yourself with the facility's safety rules and guidelines for pedestrians. Follow all posted signs, signals, and instructions.
- 7 Use Designated Walkways**  
 Stick to designated pedestrian walkways and pathways. Avoid walking in areas where vehicles and machinery are operating.
- 8 Wear High-Visibility Clothing**  
 Wear high-visibility clothing, such as reflective vests or jackets, especially if working in low-light conditions or areas with limited visibility.
- 9 Avoid Distractions**  
 Pay close attention to your surroundings. Do not use headphones or mobile phones while walking in the facility.
- 10 Make Eye Contact**  
 When crossing paths with operators, try to make eye contact to ensure they see you and are aware of your presence.

**TEAM WORK** Remember that safety is everyone's responsibility, and both pedestrians and operators should be vigilant and cautious. It's crucial to promote a culture of safety and awareness to prevent accidents and injuries.

## Crosswalk & Pedestrian Safety Floor Marking Solutions

**NEW LED Crosswalk Projector**

**Slip-Gard™ Floor Triangles**

**Slip-Gard™ Crosswalk Kit: Emergency Exit**

**Floor Stencil**

**Slip-Gard™ Crosswalk Kits**

**Slip-Gard™ Floor Marking Kit**
